An téacs foinseach

We examined the total capital expenditure under the scheme and the associated cost to the Exchequer, and the economic benefits. The study also identified changes which could be considered in relation to the ongoing operation of the scheme.

Major information deficiencies existed in relation to the operation and extent of usage of the relief. These deficiencies have been addressed as part of this study by utilising a wide range of sources. This has enabled us to prepare detailed estimates of the costs of the scheme. The estimated costs relate to projects undertaken since the inception of the scheme in 2002.
